Group Presentation

2022-2023

We
Are
Part
of
You

We started our journey in 2000, built around one goal:

To become the most preferred strategic partner of major industrial brands while having the leading expert staff and the latest technological abilities.

Since the beginning, we have been working passionately to provide the best quality and service for our partners worldwide.

We are not only part of your business but also a part of your life. We are the intersection point of every industry with our global locations and business approach. Together, we are a global and happy family working for a better future.

torunmetal.com

Our Mission

Our mission as TORUN Group is, to create value, respectively for our customers, employees, suppliers, community, environment and investors.

We are an organization that believes in universal values and ethics without prioritizing any language, religion and nation and we place human in the core of our organization.

Our Vision

The vision of TORUN Group is to provide its customers, who prioritize partnerships and share the same values as TORUN, with industrial products using different raw materials and production processes, and offer them;

- optimum cost, quality and speed,
- service in global locations,
- simultaneous engineering and design skills.

Group Companies

TORUN INDUSTRY

TORUN INDUSTRY provides central management and consultancy services to TORUN companies all over the world.

 Kocaeli, TURKEY

TORUN BRASS

TORUN BRASS specializes in casting, forging and machining of custom-made brass parts.

 Kocaeli, TURKEY

TORUN DIE CASTING

TORUN DIE CASTING specializes in aluminium and magnesium high-pressure die casting parts, especially for the automotive industry.

 Kocaeli, TURKEY

TORUN METAL

TORUN METAL is a company for localization of goods and warehouse management.

 Stuttgart, GERMANY

TORUN & SCHMIDT

TORUN & SCHMIDT focuses on high volume turning part production from brass and aluminium.

 Uhersky Brod, CZECHIA

TORUN CZECH

TORUN CZECH specializes in stainless steel CNC high precision turning per customer requirements.

 Cervenka, CZECHIA

TORUN ITALY

TORUN ITALY is the warehouse/delivery hub of brass and stainless steel parts for TORUN's customers in Europe.

 Borgomanero, ITALY

2022 Highlights

432th

Turkey's Largest Industrial Enterprises

Rising by 35 places in the rankings, we were placed 432th in the Top 500 Largest Industrial Enterprises in Turkey List, known as ISO 500.

187th

Turkey's Top Exporters List

We are ranked 200th in Turkey's Top Exporters List, made by Turkish Exporters Assembly, with an 13 place rise.

184th

Turkey's Top R&D Spenders List

In the list published every year by Turkishtime Magazine, TORUN R&D Center become 184th among the Top 250 Companies by R&D Expenditures, with its spending of 14 million Turkish Liras in 2021.

TORUN became the first company in Turkey to successfully cast a magnesium part. With our investment in state-of-the-art high-pressure magnesium die casting equipment and a new production facility, we envision becoming an essential player in lightweight e-mobility solutions.

After 4 years in brand support program, we applied for Turquality's highest level support program in order to boost our brand value globally.

Group Technologies

Everything You Need Under One Roof

As an industry leader in manufacturing and supplying high-quality metal parts, our company provides a wide range of options to our global clients. From brass to aluminium, magnesium and stainless steel, our comprehensive offering covers all the materials our customers need. What sets us apart is that we provide a one-stop-shop for all services, from design to manufacturing, ensuring that our clients get everything they need under one roof.

Brass

Our commitment to delivering customized solutions and our extensive knowledge of brass materials and manufacturing processes set us apart as a leader in the industry for custom made industrial brass parts.

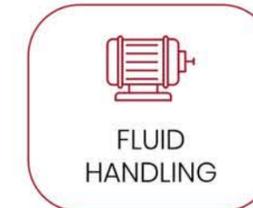

With our expertise in working with brass, we are able to create high-quality, precise parts that are tailored to the specific requirements of our customers.

Production Technologies

- Hot Forging
- Low-Pressure Die Casting
- Bar Turning
- CNC Machining
- Transfer Machining
- Plating

Locations

- Turkey
- Czechia

Aluminium

Whether you need aluminum parts for the automotive, aerospace, or energy industry, we have the experience and capability to deliver products that meet the highest standards of quality and performance.

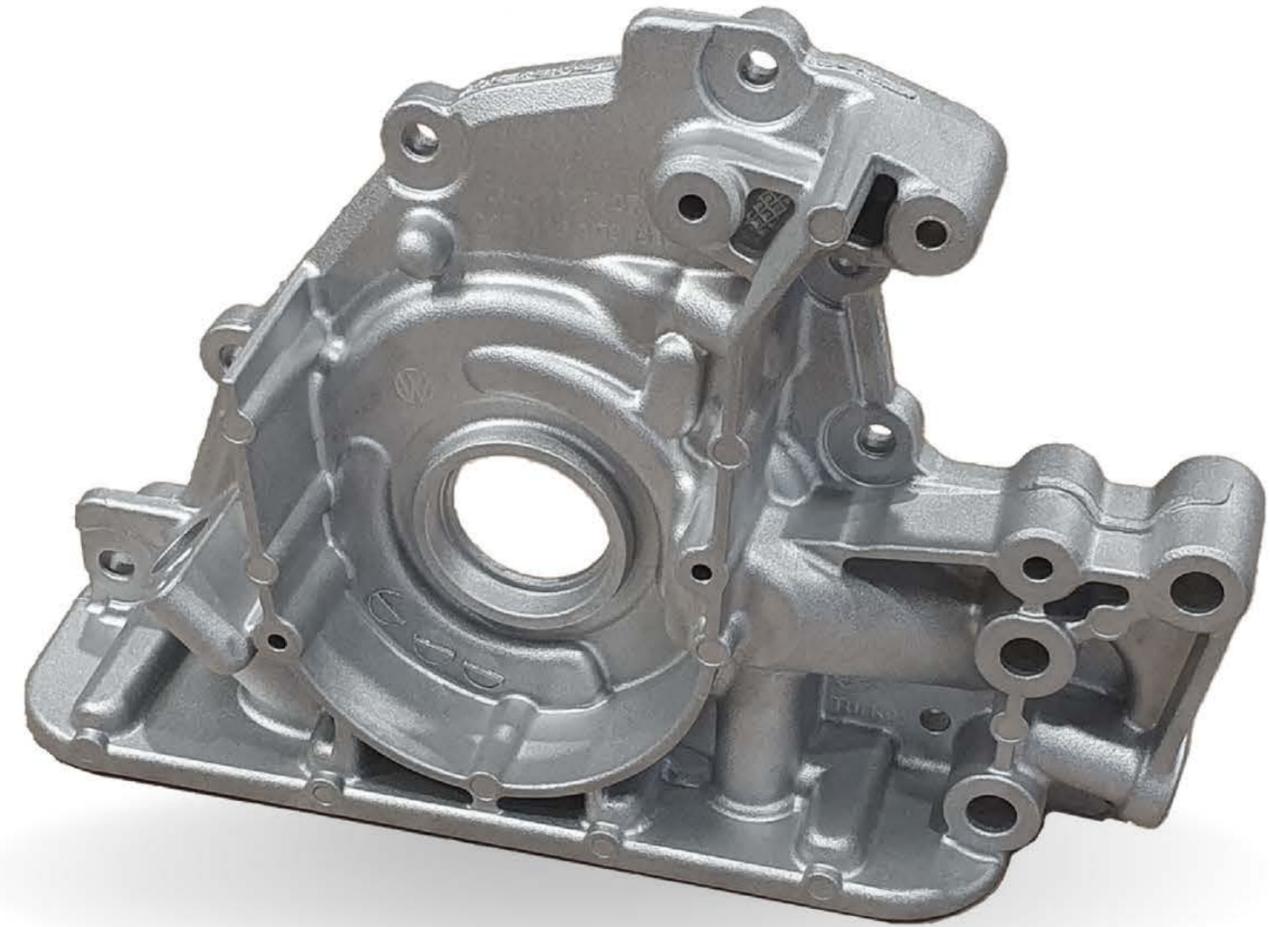

Our team of skilled professionals has the knowledge and expertise to create high-quality, customized aluminium parts that meet the specific needs of our clients.

Stainless Steel

We pride ourselves on our attention to detail, precision manufacturing, and dedication to customer satisfaction, making us a trusted partner for all your stainless steel part manufacturing needs.

Our skilled engineers and technicians have the expertise to produce custom-made stainless steel parts that meet the unique needs of our clients.

Cutting Tools & Forging Dies

Equipment for Streamlined Manufacturing

At TORUN, we take pride in our commitment to delivering high-quality products efficiently. That's why we produce all of our cutting tools and forging dies in-house. By doing so, we're able to streamline the production process and reduce lead times, resulting in a faster and leaner manufacturing process.

Surface Plating

Perfect Finish For Your Part

Surface plating is a critical aspect of our manufacturing process, and we take pride in being able to provide this service within our facility. By having the ability to perform surface plating in-house, we are able to maintain complete control over the quality and precision of our finished products.

Plating Technologies

- Bright Nickel plating in barrel for bulk parts
- Bright Nickel plating on Rack for sensible parts
- Bright Nickel / Chrome plating on Rack for polished parts

Simultaneous Engineering

From Design Phase to End Product

Growing together with our customers, we work to find perfect solutions. To increase the effectiveness of our integrated solutions per customer, we think, design, supply, and produce with them.

From design to prototyping, from material selection to process optimization, TORUN engineers support you along the project to achieve the best outcome, together.

Design Center

We Believe In The Power of Good Design

PRODUCT DESIGN AND DEVELOPMENT

TORUN has many years of experience in product development and improvement and we fully support our customers to develop parts that meet optimum product functionality.

COST CUTTING DESIGN IMPROVEMENTS

We work simultaneously with our customers to create a design that cuts costs. Best quality for the optimum price.

DESIGNING PRODUCTION EQUIPMENT

Our Design Center team is making the design for all the necessary molds, apparatus, tools and equipment for TORUN's manufacturing processes.

R&D Center

Future of Manufacturing

NEW PRODUCT DEVELOPMENT

Our committed and experienced R&D team with well-equipped laboratories and advanced engineering software is ready to become your solution partner for transforming your valuable ideas into products.

PROCESS OPTIMIZATION

Our R&D center offers optimizing manufacturing processes to improve the productivity of operations and machines, produce high quality products, and reduce the cost by utilizing advanced scientific optimization methods and tools.

RESEARCH PROJECT PARTNERSHIPS

We are closely collaborating with international research communities including universities, research institutes and with our customers to conduct research projects.

Innovation Center

Where Ideas Become Reality

INTRAPRENEURSHIP

We support corporate entrepreneurship and support any employee's project from ideation to prototyping, not only in areas related to metal.

OPEN INNOVATION

As Torun, we believe in collaboration with our customers, suppliers and academy to innovate, differentiate and create new models that will benefit all contributors.

WORKSHOPS AND ATELIERS

In our center, we share our cases with our partners to find the best possible solution. We use challenges, hackathons, start-ups and academy to find the best talent and to create value for our customers.

Sustainability

Committed to A Better Future

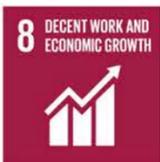

As a company, we are committed to sustainability at every level. We believe our environment is an integral part of who we are and what we do, and our responsibility is to protect and preserve it. Therefore, while we ensure that internal policies support our energy-saving and environmental efforts, we are also committed to the requirements of the UN Global Compact's principles.

Since 2019, we are a UN Global Compact signatory company and we publish our Communication on Progress - Sustainability Report every year to share our goals and commitments.

We are also a member of EcoVadis platform, where we share our scorecard with our customers. In 2022, we got a higher rating than 74% of member companies and were awarded a silver medal.

TORUN Academy

Life Long Learning and Development

CENTER FOR LIFE-LONG LEARNING

We create a passion for life-long learning with blended learning technologies powered by reputable universities and academies.

ACCREDITED DEVELOPMENT PROGRAMS

Torun Academy is an awarded academic institution that excels at providing accredited development programs in categories of “School of Management”, “School of Engineering”, “School of Foreign Languages” and “School of Quality Management” with a blend of academic and professional staff.

PREPARING NEXT GENERATIONS

Torun Children’s Academy provides programs for our children to equip them with the competencies of the 21st Century.

Kolektif Future

Designing Our Collective Future Together

We believe in collective growth, not only for our employees but also for our children. Thus, our social initiative Kolektif Future was born in 2019, where we contribute to our children's competencies fit for the 21st century and create awareness within the company thanks to the social responsibility projects created by our children.

With this program, our children receive education on many subjects and they learn how to turn their dreams into practical, concrete projects.

At the end of each education year, the successful and willing students continue to support the program by becoming mentors to younger children and suitable candidates become interns in TORUN companies.
