

# **TORUN METAL A.Ş.**

## **OUR MISSION**

- To create value for our customers, employees, suppliers, social and ecological environment and investors. We believe in universal values and ethical rules without prioritising language, religion and nationality, and we put human development at the centre.

## **OUR VISION**

- To be a global brand that adds value to its customers by offering industrial products at optimum cost, quality and speed, using different raw materials and production processes, at global locations, integrated solutions and design skills that customers need, to its customers who attach importance to developing together.

## **INTEGRATED MANAGEMENT SYSTEM POLICY**

We believe that sustainable success depends on the implementation of management systems, cost management and lean production designed for continuous improvement with an innovative approach, and that future success depends on industry 4.0 and flexible production.

Therefore, as Torun Metal;

- Being a customer-orientated team,
- To address the needs, expectations and feedback of our customers objectively and fairly in line with the principles of confidentiality and reliability and to produce effective solutions,
- To increase our production efficiency and competitiveness and to use our resources more efficiently by using developing and up-to-date technology,
- To work in accordance with the national and international legislation, legal obligations and other relevant requirements within the scope of our activities,
- To increase the qualifications and awareness of our employees in line with their needs and expectations through training and activities and to encourage their creativity,
- With the awareness of leaving a clean and healthy environment to future generations, to prevent environmental pollution caused by our activities, to minimise the formation of waste at the source, to ensure the recycling of our wastes and to develop environmentally friendly methods for these purposes,
- To make an effective risk assessment by identifying unsafe situations and behaviours that may cause occupational accidents and occupational diseases with the contributions of our employees and employee representatives in all areas where we operate, and to make a safe working environment continuous by eliminating these risks,
- To observe energy efficiency in purchased products and services, new investments and designs, production and all our processes,
- To set measurable targets to increase energy efficiency in our activities, to monitor the targets periodically and to continuously reduce the amount of energy per unit production,
- To control the environmental impacts of our products throughout their life cycle and to work towards reducing these impacts,
- To be in a sustainable co-operation with all our suppliers and solution partners based on mutual trust, development, improvement and gain,
- To make the sustainability perspective, which targets adherence to the principles of human rights and business ethics, sensitivity to the environment, people and society, a corporate culture,
- To protect the confidentiality, integrity and accessibility of the information belonging to our organisation and all our stakeholders with a sustainable understanding, to take the necessary measures to ensure the business continuity of this information, to provide the resources needed to meet the applicable requirements of the information security management system and to carry out all our activities in accordance with this policy,
- To continuously improve the effectiveness and performance of our integrated management system and to announce to all our stakeholders that we have adopted an effective risk management as our integrated management systems policy and to carry out all our activities in accordance with this policy,

We are committed.
